DISPATCH

MobileDISPATCH is a web-based Work Order, Task Assignment, Job Allocation, Scheduling & Dispatch system, with advanced configurability and interoperability to our other products.

- Quickly create Work Orders or jobs for field staff based on customer requirements, with real-time job reports and status updates
- Attach Electronic Forms, capture barcodes and obtain signature data from your customers to validate job activity
- Import jobs or data from 3rd party systems and allocate automatically or manually
- Highly configurable display of customer / dispatch requirements with Gantt style allocation, advanced reporting and real-time alerts
- Includes parts management by type and sub-type with advanced reporting of assets / parts used (and prices) for each work order or job activity
- Interoperable with **MobileFORMS** and **MobileGPS** for a complete work order management solution

INCREASE PRODUCTIVITY & REDUCE YOUR COST OF OPERATIONS WITH AN ADVANCED DISPATCH, SCHEDULING AND WORK ORDER ALLOCATION SYSTEM THAT INTERACTS WITH MOBILE PHONES, SMART-PHONE PDA'S & RUGGEDISED DEVICES, WITH ELECTRONIC FORMS FOR DATA CAPTURE TO REVOLUTIONISE FLEET CONTROL & ACTIVITY
