

SENTINEL

OCCUPATIONAL HEALTH & SAFETY IS RAPIDLY BECOMING A PRIORITY FOR MANY BUSINESSES, TO PROVIDE FIELD PERSONNEL WITH PEACE OF MIND THROUGH A REMOTE MONITORING AND ALERT SYSTEM BASED AROUND SOS, DURESS ALERTS & DEAD-MAN-DOWN (NON-RESPONSE TO MESSAGING) WITH NEAR REAL TIME ALERTS & VISUAL DISPLAYS OF PERSONNEL LOCATIONS ON MAPPING DATA.

When the SOS / Duress Alert is activated

- Nominated recipients are sent an email in near-real time
- An alert and visual notification is displayed on the web-based portal for dispatch personnel to view

Nominate your business rules for Duress and SOS

- Set the timing parameters for each automated message
- Set the default time to launch Auto-SOS if a response or verification of the message has not been received

What's in the Alert

- Name of the person launching the SOS and date/time
- Their last known GPS location (by nearest address) and a link to Google maps for direct link via Smartphone

Field Personnel Initiated SOS, Duress and OH&S Monitoring

- Field personnel can initiate SOS quickly and easily
- For increased security, personnel can initiate Duress via their handsets and nominate their own Duress settings
