

gps hardware solution specific

GPS tracking is not always about providing a single device to meet all requirements. Instead, it is often a case of matching specific hardware to a vehicle/asset AND operating environment.

Speak with our staff about the preferred solution for your field assets or personnel, with a selection of GPS hardware and selection of GPS Tracking systems to suit your specific needs.

In-Vehicle Hardware

- In-vehicle mounted hardware with optional internal or external (button) aerial
- Pre-configured hardware bench-tested prior to release using Plug 'n Play policies
- Select between ignition related tracking, or 24/7, both with a 2-year standard guarantee

External IP Rated Hardware

- IP67 rated rugged hardware which can be mounted externally to vehicles or assets
- Battery backup which charges whenever charge is received, with up to 5 days tracking
- GPRS communications, ideal for tracking heavy plant, trailers or partially-powered assets

Satellite Communication Devices

- Uses Satellite communications in lieu of GPRS / 3G network communications
- Configurable hardware with motion / movement detection
- IP67 rated and intrinsically safe devices, with replaceable batteries and mountable sleds

Other Tracking Services

- Personal Duress and SOS Alert devices using satellite communications
- Lowest cost device for QUICK installation in less than 30 seconds. Unbelievable pricing.
- And GPS Tracking from mobile handsets, phones, including tablets & slate PC's
