

# gps tracking of vehicles

Tracknology offer customers a choice of advanced tracking systems, using either our standard GPS hardware and software, or use our new world-class GPSi systems with custom hardware.

GPS tracking can be a powerful tool in your business to validate driver activity and understand vehicle location awareness, while also focusing on logistics and operational efficiencies.

- Online Demo's
- ROI Estimations
- Minimising TCO
- Pricing Options

## Your Investment

Tracknology place particular emphasis making sure our customers can access GPS technology affordably. For this reason, we maintain our policy of market leading pricing for hardware and software.

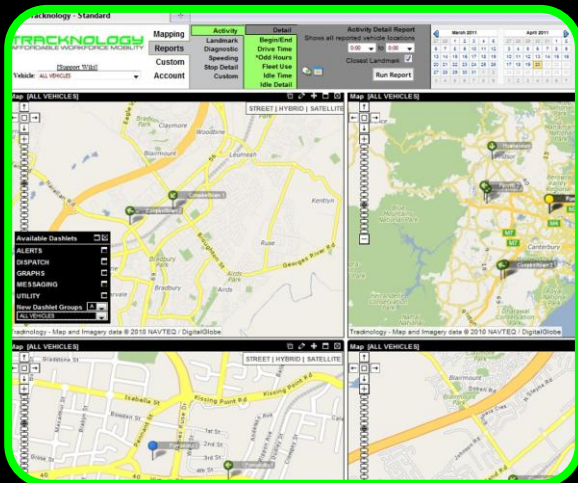

## Why invest in GPS Tracking Systems

Why do companies STILL use GPS tracking systems? To be honest, it is because they provide an entry level platform to monitoring & controlling your fleet, and have proven the ROI time & time again.

Please ask our sales team for details of:

- Benefits
- Features

## Benefits

Every company has their own reasons for wanting to invest in GPS Tracking systems. We will help you determine the best hardware, most suitable software and best pricing alternative

## Options – choose your preferred platform

- Popular in-vehicle hardware with 2 yr warranty on standard GPS tracking systems, or
- Choice of hardware plus advanced world-class systems
