

supported systems

Recently, we have seen a rapid shift in preferred devices / operating systems, with Apple's iOS systems for gaining rapid acceptance of enterprise level applications outside of the App Store.

Windows is starting to regain their fan base with new systems coming on line, while Android is challenging Apple for #1 over BlackBerry. We can help select your preferred platform.

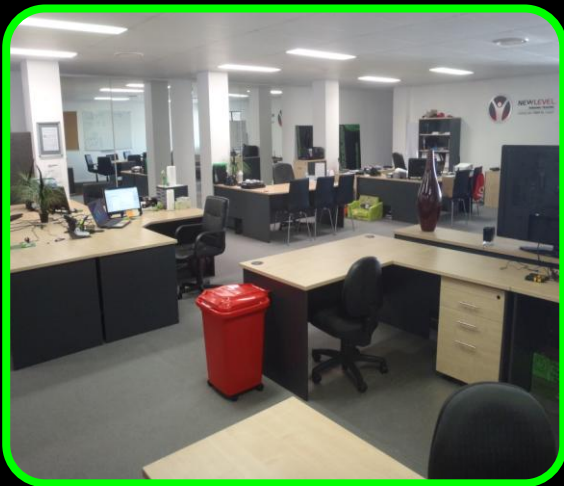

Android Handsets & Tablet Computing

- Supported for Android OS Systems 2.2 up
- Supported for handsets and Tablets
- JobSync is not supported for Android systems until Q3, 2012

iPhone and iPad
